

STATUS SYSTEMS INC.

4400 S. WINCHESTER AVE.
CHICAGO, ILLINOIS 60609
AREA CODE 312 CL 4-1340

Good Morning,

Thank you for your inquiry about STATUS System. The enclosed brochure will answer most of your questions, but I want to call your attention to four big advantages offered by STATUS System . . . over any control equipment you may have used previously.

EASY TO USE: No pins, pegs, springs or clamps! You just place HOLLOBAND strips on the steel board and forget about them. They stay

put . . . held by powerful ceramic magnets . . . until you want to re-arrange them.

MORE ECONOMICAL: You can revise STATUS System as often as you wish . . . reuse the parts indefinitely. Nothing to wear out, get lost or broken.

GREATER ADAPABILITY: Business doesn't stand still, so we have designed STATUS System to take growth and change in stride! Upgrade your control methods as often as you want to. STATUS System "goes along" with progress.

YOU'RE STILL THE BOSS! STATUS System provides you with everything you need for visibly controlling your operations . . . but lets you select your own method of control. It's no longer necessary for you to be handcuffed by a control system which has outlived its usefulness, but can't be adapted to meet new requirements.

Finally, we offer you a special introductory kit for just \$29.50 . . . unavailable from any other source. It includes exactly half of the equipment supplied in the \$59.00 assortment, and is perfectly adapted to doing a complete control job in many shops, departments and smaller businesses.

Regardless of your control requirements, STATUS System will handle them better than any other system available . . . anywhere. We offer you a 10-DAY FREE TRIAL to prove it. If you're not completely satisfied, return the kit for full credit . . . NO QUESTIONS ASKED!

The materials are fully guaranteed. Quantity prices are quoted on request.

Very truly yours,
STATUS SYSTEMS, INC.

Walter Bogusz

The **STATUS** System

T.M.

What it is:

The STATUS SYSTEM is a straightforward procedure for visual control, using polarized ceramic magnets to hold cardstock tubular strips to a steel board.

STATUS SYSTEM was developed to fulfill a demand for an effective control system that could be modified simply and quickly to keep pace with the changing demands of modern business.

How it works:

The

STATUS System
T.M.

offers

4 B

**TIME
SAVER**

Organization of control system simply requires marking of colored heading strips and spacing them on board.

EASIER TO ORGANIZE!

One motion the HOLL other positioned TOO fast without another

Holloband strips can be marked on desk or directly on board in use

Information strips are then placed below heading strip to show condition or standing.

**QUICKER TO REVISE
AND REORGANIZE!**

**TIME
SAVER**

ADDITIONAL INFORMATION CAN BE ADDED WHILE STRIP IS ON THE BOARD

ALTERATIONS OR THE LISTING OF DETAILED TYPE-WRITTEN INFORMATION CAN BE MADE WITH REVISION STICKERS

REPOSITIONING OF HEADING STRIPS CAN BE MADE IN SECONDS

The STAT sive and enable tant d and

BASIC TIME & MONEY SAVINGS!

**TIME
SAVER**

of your arm brings
BAND Strip to an-
on. Specially polar-
3 MAGNETS hold
slipping or repel-
magnet.

SIMPLER TO USE!

Information can be read
directly from distant desk . . .
"across-the-room readability"
saves time!

Simply move the HOLLO-
BAND strip below the proper
heading strip to show actual
present condition or stand-
ing.

To make room
for new Holloband
Strips, just slide
an entire section,
in unison, to
new position.

**MONEY
SAVER**

MORE ECONOMICAL!

**IN THE "STATUS SYSTEM",
T.M.
MOST PARTS ARE REUSABLE**

1) Flip the HOLLOBAND STRIPS
to use the other side.

2) Permanent TOOB MAGNETS
are easily transferred.

3) Part of a HOLLOBAND STRIP
can be kept permanent and
joined by magnet to a
second strip made variable.

4) The STATUS SYSTEM is the lowest priced,
complete visual control system;

US SYSTEM'S exclu-
most flexible features
you to control impor-
ata for greater profits
gains.

Flexibility in this system enables you to add additional information suited to your needs as illustrated in the middle and last example. The last example brings out the elasticity of the STATUS SYSTEM. Also the various contrasting colored heading strips can be cut to any desired length thus making it easier to organize jobs under their proper headings.

This is one of the most popular uses of the STATUS SYSTEM. The example shows the exact status of each job and the progression of the job through various phases of production. As the job finishes one phase in production, it can be placed under another heading thus giving valuable information to the office or shop personnel. One side of the control board can be used for office information, the other side, shop information.

The STATUS SYSTEM is an important key to a repairman's set-up of a body and fender shop. The valuable information on the strips can make his work run smoother and more efficiently. Other maintenance departments can be laid out in a similar manner. When one department finishes, HOLLO-BAND strips can be moved under another heading.

100- $\frac{3}{4}$ x 3 REVISION STICKERS
200- $\frac{3}{4}$ x $1\frac{1}{2}$ REVISION STICKERS

Accurate data or graphic control keeps management informed on how personnel are progressing. When a salesmans quota progresses higher, the HOLLOBAND strip can be moved to the proper place to indicate new standings. The STATUS SYSTEM calls for and guides decisions responsible for money making performance.

The above example illustrates how a graphical set-up can be used on a railroad for a time lost record. Quickly it illustrates the week and the month the personal injury occurred and shows the departments which have a perfect safety record.

BANDO panels are made of prime stretcher leveled steel with box channel reinforcers for extra rigidity and flatness. They are finished in flat black baked enamel for high contrast and no glare. Each panel edge has two holes for hanging or joining in any direction. All necessary hardware and hangers are included. Size of panel is 24 1/4" x 21". Two panels hung side by side measure 48 1/2" x 21". Two panels hung top and bottom measure 24 1/4" x 42". Two panels will hold fifty **HOLLOBAND STRIPS**.

HOLLOBAND strips are made of smooth faced heavy index cardstock for rigidity and smooth writing surface. Inks will not run or bleed. Available in five colors and white.

TOOB magnets are hi-strength ceramic, permanent and reusable. Specially polarized on each face, they hold strips next to each other without repelling as conventional magnets do. Each magnet has two north poles and two south poles to accomplish this. Sized to 3/4" x 1" x 3/16" for snug fit in ends of **HOLLOBAND** Strips. Two magnets are used for 24" strips and one magnet for 12" or shorter strips. One hundred magnets will hold fifty 24" strips or one hundred 12" or shorter strips.

Pens write in contrasting instant drying ink. Deep colors allow coding for immediate identification of information on strips.

Shipped parcel post insured. Shipping weight 19 lbs. We pay shipping charges anywhere in United States and Canada when payment accompanies order. **TERMS:** Net 30 days to Rated Firms.
